Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Maison et al., U.S.

Patent 5,719,860, hereinafter Maison.

3. Referring to claim 12, Maison teaches a wireless communication network in figure 1 including a base station 20. The MC 28 is a device that provides control signals to the MSC 24 for managing processing and routing of communication and control data in the base station (supply the base station with routing information). The MSC 24 routes control data signals to the BSS 22 over one of the data channel lines that connect through the ITF 26 for managing the configuration, fault, performance and security application requirements (mobility and security information) associated with providing wireless service from the base station in accordance with wireless protocol standards. A communication link from a mobile station to the base station is established (receiving uplink information from a first remote unit) at a particular frequency and enables the transfer of communication data between distinct mobile stations (utilizing the context to route information to a second remote unit bypassing network elements external to the local network) (column 3, lines 36-55).

Allowable Subject Matter

4. Claims 1-11 are allowed.

Response to Arguments

5. Applicant's arguments, see lines 3-8 of page 9 of the Request for Continued Examination, filed 2 November 2004, with respect to claims 1-11 have been fully considered and are persuasive. The rejection of claims 1-11 has been withdrawn.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Keith M. George whose telephone number is 571-272-3099. The examiner can normally be reached on M-Th 7:00-4:30, alternate F 7:00-3:30.
